-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_.

Claims 1-9 are presented for examination.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (Cancer Research 62,3550-35-37, June 15, 2002).

Lee et al. teach the use of insulin-like growth factor binding protein-3 for the inhibition of the growth of non-small cell lung cancer. The above reference suggests that IGFBP is a target for the treatment of lung cancer. See the entire abstract. The above reference also teaches the effectiveness of such compound in vivo and in-vitro. See the abstract, lines 21-23. Lee et al. differs from the claimed invention in the use of IGFB-3 in a patient with the conventional mode of administration. It would have been obvious for a person skilled in the art to employ a compound being successful in inducing apoptosis in lung cancer cells in-vivo and in-vitro and use it for clinical purposes, considering that the success in in-vitro and in-vivo experimental use is often an indicative of successful use in the patient population. One skilled in the art would have been motivated to employ the teaching of the above reference, since it relates to the use of the claimed compound as an agent which causes apoptosis and inhibits the growth of non-small cell lung cancer. The determination of different routes of administration is considered to be within the skill of the artisan. Applicant has presented

Art Unit: 1614

no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-9 are properly rejected under 35 U.S.C. 103.
